**Importance:** High

A few weeks ago, Doug told Joe he was interested in discussing how this info would be shared/ rolled out. Just wanted to make sure that message got to all of you.

Suzanne

Anaconda school sampling info. All results (arsenic and lead) came in well under residential action levels.

Gerry,

Please see the attached Data Summary Report for the school interior sampling conducted by EPA over spring break. The cover letter and figures provide a brief summary that can be shared with the school board explaining the results of the sampling event.

As indicated in the letter, EPA is planning to sample remaining school buildings (as well as resample historic dust in the previous schools) in early June. We will continue to coordinate with Art for access.

If you have any questions, please give me a call.

Charlie
